DETAILED ACTION

Allowable Subject Matter

1. Claims 1-3 are allowed.
2. The following is an examiner's statement of reasons for allowance.

Thompson et al. disclose the construction of a control system and circuits for distributed electrical power generating stations comprising:

a fault detecting means for detecting a fault in the interconnection with the power network; and

a means for interconnecting the output of the power generator with the power network, when the oxygen density sensor becomes its activated state.

Kaneyasu et al. teaches the construction of a diagnosis system and optimum control system for internal combustion engine comprising an oxygen density sensor provided on the engine for the purpose of allowing optimum control of fuel in the air-to-fuel ratio feedback of the engine.

Gilliusion disclose the construction of a co-generation system having a waste heat utilizing unit for utilizing waste heat produced by the operation of the engine generator apparatus, wherein the engine is started in response to a heat request generated by the waste heat utilizing unit for the purpose of providing heat for a heating system.

The prior art of record, taken alone or in combination, fails to teach the construction of an engine generator apparatus for interconnecting an output of a generator driven by an engine with a power network, wherein:

the generator is connected to the power network when the oxygen density censor is in its actuated state, after the engine has started; and

means for canceling the interconnection with the power network when the fault detecting means detects a fault, and resuming the interconnection with the power network when the fault is removed; or means for stopping the engine when the interconnection is canceled for a predetermined length of time due to the fault detection.

Dependent claim 3 is considered allowable by it's dependence on allowed independent claim 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892.
